Experience

Software engineer with 4+ years of experience in front-end and back-end development.

Experienced in collaborating with coworkers and clients from diverse disciplines and backgrounds, with a proven track record of delivering high-quality projects even under challenging time constraints.

Adept at navigating dynamic environments, working effectively within small teams and evolving processes, and identifying where change is needed through research and initiative.

Plant a Flag / Web Developer

March 2024 - Present | Brussels, Belgium

Championed a modern project workflow, reducing development startup times for websites by as much as 8 hours, alongside streamlining team collaboration and project flows.

Advocated and implemented new tech (WordPress, Elementor, Webflow, Framer) to win new prospects and expand our technical repertoire, leading to better synergy with clients.

Interacted directly with clients to discuss new projects, support existing ones, and train them in the use of CMS websites.

-> Junior Web Developer

November 2021 - March 2024 | Brussels, Belgium

Led the full-stack development and deployment of 10+ high-visibility websites for diverse clients, including non-profits. Built web experiences that struck a balance between aesthetics and functionality, making it easier for clients to engage visitors and share their mission clearly.

Spearheaded the transition to a modern tech stack (DDEV, Docker, modern plugins/libraries) and improved customer experiences on our website backends through several UI and UX improvements, including modern themes, standardised editor flows, and naming conventions.

-> Web Development Intern

February 2021 - May 2021 | Brussels, Belgium

Focused on expanding my technical boundaries, primarily learning Drupal. This included handling customer tickets and collaborating with multiple team members.

Technical Skills

Drupal	SASS / CSS	Twig	PHP
HTML5	JQuery	Javascript ES6	SQL
React	Node.js	Laravel	Bootstrap
Vue.js	Tailwind	Webflow	Framer

Soft Skills

Efficient communication

Feedback-positive collaboration

Inquisitive & research-driven

Improvement-oriented thinking

Client-focused problem solving

Education

Thomas More / Interactive Multimedia Design

September 2018 - June 2021 | Mechelen, Belgium

A Professional Bachelor's Degree in IT, specialised in designing and developing web apps and mobile applications, from wireframing to tech stack research, database configuration, and server setup for deployment pipelines.

Led a team of developers and designers for my thesis project to create a social app directed at users interested in film. Built using Laravel Homestead, Tailwind CSS, and Vue.js. Deployed on a custom server via Linode.

Ostend Air College / Airline Transport Pilot License

August 2016 - May 2018 | Ostend, Belgium

University of Kent / Transition Year - Focus on psychology

September 2015 - June 2016 | Canterbury, United Kingdom

Yongsan International School of Seoul / High School Diploma

August 2010 - May 2015 | Seoul, South Korea
